

How the Twist is Different

F-MATIC has designed a cartridge that is completely spill-proof after activation. Twist activation is nearly effortless with our patented two-step 'twist and click' execution, an audible CLICK signaling that the cartridge is activated and sealed against leakage.

The Twist cartridge is also fully recyclable with no disassembly required! Just toss in the recycling bin after use.

Fragrance Selector

A wide range of scent intensities to eliminate any odor.

Why the TWIST?

The Twist utilizes our reliable **gravity-fueled** system to continually replenish the fragrance.

It **never requires batteries**, fuel cells, or another artificial means of power! The Twist **neutralizes odors in up to 6,000 cubic feet of space**, equivalent to a three-stall restroom for a **full 60 days**. Twist fragrances **match some of our most popular products** such as urinal screens, toilet bowl clips, and hang tags. This keeps a restroom smelling the same, without mixing fragrances. The Twist's unique design and activation make for a **completely spill resistant** product from start to finish. The Twist is both **VOC and REACH compliant**. **Fits competitors' existing dispensers** for easy switchover! Equipped with an **odor counteractant system** to effectively fight odors. Twist **fragrance oils evaporate**, leaving minimal residue on wick. Our **premium Twist fragrances** don't just mask odors, but completely eliminate them using our patent technology Odouraze. Odouraze will effectively fight odors right at its source! Twists work best **in an area with optimal air flow** and not directly under a ventilation intake system.
